Bethesda of Beresford Nursing Home Has Achieved a National Nursing Home Quality Measure Composite Score of 6.00 or Less Reflecting High Quality of Care

Beresford, SD – Bethesda of Beresford nursing Home has achieved a score of 6.00 or less on the National Nursing Home Quality Measure Composite Score. The Composite Score was developed as part of the National Nursing Home Quality Care Collaborative (NNHQCC) efforts and offers a means to look at quality from a systems perspective. Comprised of 13 National Quality Forum-endorsed, publically-reported, long-stay quality measures, the tool is especially valuable in providing current data to help drive improvement efforts at an accelerated pace.

The NNHQCC is a face-paced initiative which strives to instill quality and performance improvement practices, eliminate healthcare acquired conditions and dramatically improve resident satisfaction through the achievement of a rate of 6 or less using the Quality Composite Measure.

To build upon efforts of the National Nursing Home Quality Care Collaborative, Bethesda of Beresford is committed to participating in the South Dakota Great Plains Nursing Home Quality Care Collaborative, a Collaborative facilitated by the Great Plains Quality Innovation Network. The statewide Collaborative format is designed to bolster quality improvement in nursing homes throughout South Dakota in conjunction with national efforts.

“We congratulate Bethesda of Beresford on this significant achievement and their efforts to improve the quality of life and care for their residents. Through the South Dakota Great Plains Nursing Home Quality Care Collaborative, we are committed to working together to identify areas for improvement and the tools and resources needed to continue progress. The data offered by the Composite Score is extremely valuable in measuring progress on a monthly basis; coupled with other measurement tools. Bethesda of Beresford has a clear and up to date picture of where it stands on key quality measures and overall quality of care. Bethesda of Beresford should be pleased with this accomplishment and proud of the level of care being offered,” stated Lori Hintz, RN, Quality Improvement Advisor with the Great Plains Quality Innovation Network.

“It is very honorable to be recognized by Great Plains Quality Innovation Network. Bethesda of Beresford has an amazing interdisciplinary team that has the dedication and commitment to implement the necessary changes to make Bethesda a great home for our residents as evidenced by our quality measure composite score that places us in a ranking of 3 out of 110 nursing homes in SD,” replies Diane Casperson, RN, Director of Nursing at Bethesda of Beresford.

Bethesda of Beresford is a Christian Community dedicated to the art of healing and the joy of caring.
